

Kidlet Chronicles

Baby Days and Toddler Tales Demo Instructions

The following is a quick introduction on how to get started with the demo application. Specific instructions for using the software can be found in the application's 'Help' file.

The demo is fully-functional except for the fact that you will not be able to save any information you may input. To purchase the full version, please visit our website at www.kidletchronicles.com.

Starting a New Album

To create a new family album, select File > New Family Album. A 'Create New Family Album' dialog will pop up, prompting you to name your Album (usually your family name, i.e. The Smith's Album) and your kidlet's name.

Note: If you use a temporary nickname for your kidlet (i.e., Little Bean, Sprout, Jitterbug), you can easily change the name at any time by simply selecting 'Rename Kidlet' under the Kidlet menu.

Once you have entered in your kidlet's name, select 'Create'. The program icons are now unlocked and the pages are ready for your verbage!

Additional kidlets can be added to your album at any time by selecting "Add Kidlet" under the Kidlet menu. To toggle between your various kidlets, go to Kidlet > Select Kidlet and choose there. This makes it easy to toggle between all your kidlets and compare their information.
